

### Open Studio

Join one of NIC's metal jewellery instructors in an open studio format at the Campbell River campus. You can use the equipment and tools in the NIC studio to work on your jewellery projects (excluding lost wax casting and mold-making), while getting expert guidance and tips from the instructor. The open studio also allows you to work side-by-side with your peers in a supportive, creative environment. Our Campbell River studio is well equipped with a variety of electric and hand tools, work benches and reference materials.

This is an excellent opportunity to continue to work on the skills you learned in other courses and complete some additional projects in a professional studio under the guidance of a professional!

**IMPORTANT:** Participants must have some experience in jewellery making and design and come with some projects & pieces to work on. The open studio is suitable for students who have taken one or more of the NIC Metal Jewellery courses/programs including the part-time Silver Jewellery Making-Beginner's course OR the Silver Jewellery Express I & II OR the Metal Jewellery Design certificate OR other similar jewellery making courses. Students must supply their own materials and consumables for their projects. Contact Julia at [julia.peters@nic.bc.ca](mailto:julia.peters@nic.bc.ca) if you are unsure whether this workshop is suitable for you.

### Supplies and Materials required (to bring from home):

- Safety glasses
- Respirator
- Apron
- Any metals, stones or other materials needed for your project(s)
- A clear vision of your project and what you want to accomplish during the session

*Bring a bagged lunch and beverage as a short break will be taken.  
Please wear close-toed shoes for safety.*

**Check your receipt for class date(s), time and location.**
